

I respectfully urge the FCC to reject the NAB's petition 04-160. I pay for XM Radio and believe they should be able to offer "locally oriented" programming for the good of the listener. When travelling XM radio provides quality in the programming and sound that is unmatched. It is very important when travelling through an area that XM offers up to date traffic and weather, that I receive that information. It could be a family vacation that runs through various cities that XM covers not necessarily a "locally oriented" program but a VERY important service to it's customers. I appreciate that XM can and should be able to continue this service. Thank You.
